When using high-pressure equipment, the product may be injected. In case of injury caused by high pressure, seek medical attention immediately. Do not wait for symptoms to appear. Hold the burned area under cold running water for at least five minutes or until the pain subsides. Hypothermia of the body must be prevented. In case of severe burns, always seek medical attention. Wash the affected area with soap and water, alternatively with Previn. May cause burns if contact with the product at high temperatures. Symptoms: dry skin, irritation with repeated or prolonged exposure.

If in eyes

Rinse eyes immediately with a flow of running water, open the eyelids (also using force if needed); remove contact lenses immediately if worn by the affected person.

If swallowed
